

Construction of upgrades and improvements to Shore Water Co's elevated water tank located at 105 23<sup>rd</sup> Ave. will begin in mid-September. \$500,000 of the project cost is financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by performing needed maintenance work on the elevated water tank that provides service to the residents and businesses in the South Seaside Park section of Berkeley Township.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
